

YOUR REFINISHED SURFACE

A little care. A lasting finish.

Your practical guide to caring for a freshly refinished bathtub, tile or shower pan.

KEEP THIS GUIDE HANDY

BEFORE FIRST USE

48 to 72 hours

Give the coating time to cure.

Keep the surface dry and unused until the cure period specified by Dab Hands has ended. Your individual project instructions take priority.

Your gentle cleaning routine

1 Wash gently.

After the finish has cured, use mild liquid dish soap diluted in warm water. Wipe gently with a soft cloth or a nonabrasive sponge.

2 Rinse completely.

Use clean water to remove soap and cleaner residue. Do not leave cleaning products sitting on the coating or let them dry on it.

3 Wipe dry.

Use a clean, soft towel to remove standing water. Regular, gentle cleaning helps prevent buildup that can lead to hard scrubbing.

THE DAB HANDS CARE GUIDE

Simple habits. A beautiful finish.

Your cleaning kit

01

Mild liquid soap

Example: original Dawn dish soap, diluted in warm water.

02

A soft cleaning tool

Microfiber cloth or a sponge without a scouring surface.

03

A gentle alternative

Nonabrasive liquid cleaner approved for your finish.

Product formulas vary. Follow your project instructions and ask Dab Hands before trying a different cleaner. Never mix cleaning products.

Good everyday habits

- Rinse and wipe dry after use.
- Keep soap, bottles and wet objects on a separate shelf.
- Repair dripping faucets and damaged caulk promptly.
- Ask us about suitable bath mats and accessories.

What to keep off the finish

- Abrasive powders, scouring pads and steel wool.
- Bleach, ammonia, strong acids and drain chemicals on the coating.
- Suction cups, adhesive strips and sticky attachments.
- Sharp impacts, picking, scraping or home touch ups.

Notice a chip, peeling or a change?

Stop scrubbing or picking at the area. Send us a clear photo and contact Dab Hands before attempting a repair.
